The WORLD'S WORD for
ELEVATOR SAFETY

The WORLD'S WORD for
ELEVATOR SAFETY

EIFFEL TOWER

*Most of the famous buildings in the world
are equipped with Otis Elevators*

THE EIFFEL TOWER lifts its head nearly one thousand feet above the city of Paris. Countless people have made the trip to the top to see the glory that was, and is and always shall be—Paris.

Millions have seen the Eiffel Tower! Many more millions have read of it, yet comparatively few know that this—the tallest structure in the world—is served by Otis Elevators.

It could hardly be otherwise. The name "Otis" epitomizes the very beginnings and also the latest, greatest achievements in vertical transportation.

Hercules Dynamite for Good Roads

Hercules Dynamite is helping thousands of highway engineers and contractors to solve the great variety of problems that face them.

With the help of Hercules Powders these men are grading roadbeds—driving cuts and tunnels through hard rock—ditching swamps and clearing right of ways in every part of the United States. In fact, Hercules Explosives are a very important factor in the present drive for good roads.

The high and uniform quality of these powders—their reliability and great efficiency under all blasting conditions—make them particularly adaptable for road work.

If we can help you with your blasting problems write us. Our service staff will answer your questions promptly and fully.
